E2000 FIBER OPTIC PATCH CORDS

Designed for data center, enterprise, FTTx, LAN and WAN, CATV network, telecom network applications etc. requiring quick infrastructure deployment such as main, horizontal, and zone distribution areas.

Standard Fiber Patch

The E2000* connectors used are featured with spring-loaded shutters that open when engaged and close when disengaged protecting ferrules from dust and scratches. The connector's push-pull latching mechanism clicks when fully inserted. In addition to basic testing, some mechanical and environmental tests per IEC or Telcordia are also performed periodically to guarantee the best quality. For standard patch cords, sampling check is performed on ferrule geometry to ensure high percentage of polished connectors meeting GR-326 requirements. For premium grade, ferrule geometry is tested on all patch cords to meet these requirements. Other than standard single mode and multimode fibers, G655, OM2, and OM3 fibers are also available upon request. Flame retardant grade cable sheathing options are offered. Riser rated cable will be provided as standard. LSZH and Plenum can be provided upon request.

Features

- » Push-pull latching mechanism
- » Protected by spring-loaded shutters
- » Low insertion loss and high return loss
- » Materials meet RoHS requirements
- » Riser, Plenum, or LSZH cables

Applications

- » Telecommunication
- » Computer networks
- » CATV networks
- » Active device termination
